

## EvidenceWorks® IRS

Secure Evidential Audio/Video Digital Interview Recording

The **EvidenceWorks® IRS** solution is the UK's market leading solution for capturing evidentially sound recordings of interviews. The system is used widely across UK Police Forces and other UK and International government agencies including the International Courts of Justice where the evidential integrity of the interview is of paramount importance.

**EvidenceWorks® IRS** operates in all environments where interviews are recorded, whether audio only or audio and video, in dedicated interview rooms or as a portable solution for use in diverse locations.

### Benefits-driven and compliant

**EvidenceWorks® IRS** has been designed and specified to be compliant with legislative guidelines, including the UK Police and Criminal Evidence Act (PACE). It provides a number of unique features that make it the solution of choice when migrating from either analogue to digital recording, moving from audio only to audio/video recording or when moving to an integrated network connected environment.

**EvidenceWorks® IRS** is flexible enough to meet diverse interview recording requirements – be it in standard interview rooms or in the more sensitive and discrete areas of victim and vulnerable witness interviewing. Recording devices can be located within an interview room or used to record and control interview recording remotely. Portable solutions allow the same recording software to be used in any location, for example hospitals or temporary incident and event locations.

## Feature-rich and flexible

Capita's market-leading solution provides:

- State-of-the-art digital interview recording software and purpose designed devices
- Software only solutions available working with commodity PC and Laptop platforms
- Evidentially sound digitally signed recordings
- Simple and intuitive touchscreen operation providing one touch recording
- Support for up to 4 audio streams (internal and external microphones) and 4 camera streams including Pan-Tilt-Zoom camera support
- Configurable business information (metadata) captured alongside interview media
- Adjacent Room monitoring support
- Resilient to power failure
- Covert or Overt interview bookmarking via remote key-fob
- Operates
  - Either as standalone devices burning DVD media (up to 3 simultaneous copies)
  - Or with network attached devices allowing optional DVD media free environment, integration with operational IT systems for business information and interview media exchange and remote support
- Solutions for interview transcription and downstream interview management available

EvidenceWorks® Feature Matrix				
Feature	Fixed IRS	Portable IRS	Software Only (PC Based)
